EDUCATION

George Mason University , College of Engineering & Computing, Fairfax VA	Jan 2025 - Dec 2026
Master of Science in Computer Science	4.0/4.0
Savitribai Phule Pune University , Sinhgad Technical Institutes Campus, Pune India	June 2020 - May 2024
Bachelor of Engineering in Information Technology	3.68/4.0
Relevant Coursework: Software Engineering, Design and Analysis of Algorithms, Database Management Systems, Operating Systems, Object Oriented Programming, Machine Learning, Data Structures, Deep Learning, Computer Vision	

TECHNICAL SKILLS

Programming Languages: C++, Python, React, SQL, HTML, JavaScript, CSS
Libraries & Frameworks: Numpy, Pandas, Scikit-Learn, Matplotlib, TensorFlow, Flask, Keras, Bootstrap
Tools: Visual Studio Code, GIT, MongoDB, MySQL, PowerBi, Eagle (Autodesk)
Database: MySQL, MongoDB, SQL, RDBMS

WORK EXPERIENCE

George Mason University Graduate Professional Assistant	September 2025 - Present
- Support mission-critical admissions and recruitment systems by managing data flow across platforms, creating and running data imports, assisting with ETL processes, and troubleshooting integration or data-quality issues. - Perform CRM system administration and documentation while working with Python scripting and relational databases to maintain accurate records and support technical operations within Admissions Technology Department.	
LetsGrowMore Web Developer Intern	March 2023 - April 2023
- Built full-stack web applications with responsive UI using HTML, CSS, JavaScript, and backend integration for optimized result. - Delivered projects like a task manager and math operations tool, applying practical development and deployment skills.	
Salesforce Developer Catalyst	October 2022 - December 2022
- Earned badges in Apex, Developer Superset, and Process Automation by completing hands-on Salesforce modules. - Applied development and testing skills in Trailblazer projects, gaining real-world exposure to Salesforce ecosystems.	
Oasis Infobyte Web Developer Intern	May 2022 - June 2022
- Created optimized backend queries and interactive frontend components to improve web app performance. - Designed clean and intuitive UI/UX layouts, enhancing usability and accessibility for web-based platforms.	

PROJECTS

Tuberculosis Detection and Hospital Recommendation System

- Developed a web-based system using **Python, Tensorflow** and **Keras** to detect Tuberculosis from chest X-ray images with the help of **Convolutional Neural Networks (CNNs)** and demographic data, achieving **95% accuracy**.
- Developed an intuitive **Flask-based GUI** for user input and displaying TB prediction results and hospital recommendations.
- Implemented a **hybrid recommender system** using content-based & collaborative filtering to suggest suitable hospitals.

PCB 'Airborne Ace' – Sensor Driven Flight Data System

- Built a custom 2-layer PCB "Airborne Ace" using **Eagle and Arduino (C++)**, integrating **3+ sensors** (barometer, accelerometer, gyroscope) to capture real-time flight data at 50–100 Hz, with onboard SD-card logging for analysis.
- Developed an apogee-detection algorithm with **92% accuracy**, validating performance by comparing Airborne Ace data against two **COTS altimeters (AltusMetrum & MissileWorks)** across multiple test flights.

Task Management System

- Built a browser-based task tracker using **JavaScript, HTML**, and **Bootstrap**, allowing users to add, edit, and delete tasks, with data saved in local storage.
- Designed a clean and responsive layout where users could easily organize tasks by status using collapsible sections and intuitive controls.

LEADERSHIP & EXTRACURRICULAR

Vivaswan College Magazine Team - Sinhgad Technical Institutes Campus Head	March 2022 - November 2023
- Led the college magazine team of writers, designers, and editors to plan, create, and publish monthly issues. - Managed content creation, layout design, and distribution while fostering a collaborative creative environment.	
STES Rocketry Team - Sinhgad Technical Institutes Campus Avionics Engineer	December 2022 - October 2023
Represented India at the Latin American Space Challenge in Brazil, securing 1st in Asia and 4th worldwide, while engineering power circuit boards with temperature, pressure, and altitude sensors using Eagle, Altus Metrum, and Arduino for routing, coding, and system integration.	
MS Sports Club Fitness Coach	December 2021 - June 2024
Trained and coached 100+ students in fitness and sports while leading 30+ outdoor trekking expeditions, managing logistics, safety, and event coordination including tournaments and transportation.
