EDUCATION

George Mason University, College of Engineering & Computing, Fairfax VA Jan 2025 - Dec 2026
Master of Science in Computer Science GPA: 4.0/4.0
Savitribai Phule Pune University, Sinhgad Technical Institutes Campus, Pune India June 2020 - May 2024
Bachelor of Engineering in Information Technology GPA: 3.68/4.0
Coursework: Software Engineering, Design and Analysis of Algorithms, Database Management Systems, Operating Systems, Object Oriented Programming, Machine Learning, Data Structures, Deep Learning, Computer Vision

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, SQL, HTML, CSS
Frameworks/Libraries: React.js, Node.js, Express.js, Flask, Tailwind CSS, Bootstrap, NumPy, Pandas, Scikit-Learn, TensorFlow, Keras
Databases: PostgreSQL, MySQL, MongoDB, Relational Databases
Tools: Git/GitHub, VS Code, Postman, pgAdmin, Vercel, Render, PowerBI, Eagle

WORK EXPERIENCE

George Mason University | Graduate Professional Assistant September 2025 - Present

- Support mission-critical admissions and recruitment systems by managing data flow across platforms using **Informatica for ETL processes**, creating and running data imports, and troubleshooting integration or data-quality issues.
- Perform CRM system administration and documentation while working with **Python scripting** and **relational databases** to maintain accurate records and support technical operations **within Admissions Technology Department**.

LetsGrowMore | Web Developer Intern March 2023 - April 2023

- Developed user-facing web applications using **JavaScript, HTML, CSS**, and responsive UI principles. Integrated frontend components with backend logic, gaining experience with full-stack development workflows.
- Delivered projects like a task manager and math operations tool, applying practical development and deployment skills.

Salesforce | Developer Catalyst October 2022 - December 2022

- Earned badges in **Apex, Developer Superset, and Process Automation** by completing hands-on Salesforce modules.
- Applied development and testing skills in Trailblazer projects, gaining real-world exposure to Salesforce ecosystems.

PROJECTS

RuleWise - Intelligent Event Monitoring Platform

- Built and deployed RuleWise, an intelligent event monitoring system processing 1000+ daily events with real-time alert generation, utilizing **React.js, Node.js, and PostgreSQL** to create a scalable architecture.
- Architected **RESTful API with JSONB-based** flexible rule storage & custom evaluation engine supporting multiple operators; implementing responsive UI with search, filtering & template features that improved **user efficiency by 80%**

Tuberculosis Detection and Hospital Recommendation System

- Developed web-based system using **Python, TensorFlow** and **Keras** to detect TB from X-ray images with CNNs, achieving **95% accuracy**.
- Developed intuitive **Flask-based GUI** for user input and displaying TB prediction results and hospital recommendations.
- Implemented **hybrid recommender system** using content-based & collaborative filtering to suggest suitable hospitals.

Task Management System

- Built a browser-based task tracker using **JavaScript, HTML** and **Bootstrap**, allowing users to add, edit, and delete tasks, with data saved in local storage.
- Designed a clean and responsive layout where users could easily organize tasks by status using collapsible sections and intuitive controls.

LEADERSHIP & EXTRACURRICULAR

Vivaswan College Magazine Team - Sinhgad Technical Institute Campus | Head March 2022 - November 2023

- Led the college magazine team of writers, designers, and editors to plan, create, and publish monthly issues.
- Managed content creation, layout design, and distribution while fostering a collaborative creative environment.

STES Rocketry Team - Sinhgad Technical Institute Campus | Avionics Engineer December 2022 - October 2023

- Represented India at the Latin American Space Challenge in Brazil, securing 1st in Asia and 4th worldwide, while engineering PCBs with temperature, pressure, and altitude sensors using Eagle, Altus Metrum, and Arduino for routing, coding, and system integration.
